

Advanced Technology *kept simple*

Designed and Manufactured in the UK

merlin
multi-fuel stoves

The merlin range

Unique stoves that *simply* offer you more

Our Merlin range of stoves has been carefully built and crafted to perfection. They have been created to meet the ever increasing market demand for high efficiency and exceptionally environment friendly stoves as an alternative heat source for the home.

Merlin Widescreen
with moulded log box

Design & Concept

The stoves' clear cut British design is aesthetically pleasing and has been created to give a welcoming visual experience by offering an ultra clear view of the fire at all times. Defying contemporary or traditional labels, these unique stoves become a natural focal point in any setting. Merlin Stoves have simple and uncomplicated lines, yet they are attractive in every fashion sense.

Construction & Performance

The revolutionary (patent pending) triple chamber construction and low draught starting make the Merlin range unique on the market when it comes to performance, efficiency and low emissions. Appearing elegant on the outside, they are extremely robust and powerful on the inside. Built with the latest technology, these easily controllable stoves run without the need for additional fussy components and expensive accessories whilst coping effortlessly with all weather conditions.

Merlin Standard
with moulded feet

Unique RAM Air System

Rapid Air Movement can be achieved in seconds, enabling the instant lighting of the stove. Unlike some, these stoves do not need to be pampered. The firebox can be transformed into a spectacular unobstructed living flame in seconds. The unique characteristics allow clean combustion and clean flames to bring warmth into the room in minutes. Intelligent heating to say the least.

Stay Cool hearth -
Additional safety feature.

merlin

WIDESCREEN

The Merlin Widescreen will create the right impression in any home. With its huge glass window, it not only offers everything in looks, it also works without the need to pamper. The super large fire box takes 24 inch logs with minimal fuss, allowing you to relax for hours and enjoy the view. Controlling this stove is simply effortless.

Forestry Commission
Merlin Stoves
is an approved supplier to
the Forestry Commission

British Designed
and Manufactured

Merlin Stoves are different in every sense, not only in performance and efficiency but also in stylish good looks.

Contemporary or traditional, Merlin Stoves are noticeably different. There is one single door to clearly see more. It is a dust free clean design, without fussy details.

All our stoves are built with Merlin's patent pending **Rapid Air Movement** technology. Unlike other stoves, heat is delivered to the room in seconds after

lighting. Straightforward controls mean regulating and maintaining the desired temperature is simple.

The stove's twin-skinned insulated jacket ensures heat is accumulated and maintained within the stove body for hours after shutdown.

The Merlin range of multifuel stoves is revolutionary in all respects, and brings a whole new way of thinking when it comes down to natural conventional heating!
